Electrical power quality meter dataset

Real world time-series dataset collected from an electrical power quality meter.

[Data Card](#)[Code \(3\)](#)[Discussion \(1\)](#)[Suggestions \(0\)](#)

About Dataset

Context

This dataset was extracted during an Industry visit by VIT Vellore faculty member, Dr Raja Singh R. We obtained this dataset for a course project review.

Content

A collection of several electrical power quality parameters, such as RMS Voltage, Current, Power, Phase Angle, Current Phase Angle etc.

Acknowledgements

- Dr. Raja Singh R, for providing the dataset
- Tanmay Thakur, for the initial kernel

Tasks

Feel free to do anything you like with this data.

Usability
